

Strategic Plan Framework

This Plan includes four goals, each of which includes specific objectives and strategies. Taken together, these should not be viewed as sequential, but as interdependent with the collective purpose of improving the health of individuals, families, and communities.

<p>GOAL 1</p>	<p>Promote Health and Wellness</p> <p>Objective 1a: Improve individual access to usable health information</p> <p>Objective 1b: Advance healthy and safe practices through health IT</p> <p>Objective 1c: Integrate health and human services information</p>	<p>GOAL 4</p> <p>Connect Healthcare with Health Data</p>
<p>GOAL 2</p>	<p>Enhance the Delivery and Experience of Care</p> <p>Objective 2a: Leverage health IT to improve clinical practice and promote safe, high-quality care</p> <p>Objective 2b: Use health IT to expand access and connect patients to care</p> <p>Objective 2c: Foster competition, transparency, and affordability in healthcare</p> <p>Objective 2d: Reduce regulatory and administrative burden on providers</p> <p>Objective 2e: Enable efficient management of health IT resources and a nationwide workforce confidently using health IT</p>	<p>Objective 4a: Advance the development and use of health IT capabilities</p> <p>Objective 4b: Establish expectations for data sharing</p> <p>Objective 4c: Enhance technology and communications infrastructure</p> <p>Objective 4d: Promote secure health information practices that protect individual privacy</p>
<p>GOAL 3</p>	<p>Build a Secure, Data-Driven Ecosystem to Accelerate Research and Innovation</p> <p>Objective 3a: Advance individual- and population-level transfer of health data</p> <p>Objective 3b: Support research and analysis using health IT and data at the individual and population levels</p>
